

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX.

- Academy of Natural Sciences, letter from the, in relation to a proposed National Museum, 111.
- Acid, chlorohydric, pure, mode of preparing, 160.
- Adams, Mr. J. Q., Report to the House of Representatives on Magnetic Observations, &c., 320.
- Adet, M., his death announced, 10.
- Air, moist and dry, results of rarefaction of, 200.
- Airy, Prof., instrument for observing vertical magnetic force by reflection, 313.
- Alexander, J. H. Esq., on the construction of a standard barometer, 320.
- Prof. S., description of the aurora borealis of Sept. 3, 1839, 132.
- — on two appearances of lateral and vertical mirage observed by him, 188.
- — presents transparent models of crystals, 97.
- Allen, Benj., LL.D., his death announced, 217.
- Mr. Z., of Providence, description of a tornado there, 48.
- Andrada e Silva, Don, his death announced, 61.
- Anemometer, Osler's, Mr. Walker on, 3.
- Asphalt of Seyssel, remarks on, by Mr. Strickland, 47.
- Association, American, for the promotion of science, proposed, 77.
- Astronomical committee directed to report on the High School instruments, and on the subject of an observatory, 276.
- instruments at the High School observatory, 276.
- observations made by Prof. Loomis, 129.
- Atmosphere, phenomena connected with the presence of aqueous vapour in the, 237.
- Audubon, Mr., his remarks on Wilson, the Ornithologist, noticed by Mr. Ord, 272.
- Aurora Borealis, description of, by Prof. Alexander, 132.
- Bache, Dr., appointed reporter, 24.
- announces the death of John Fred. Blumenbach, 188—of Dr. Eberle, 6—of Mr. F. H. Le Comte, of Paris, 60—of Dr. John Newman, of North Carolina, 108—of Dr. Jos. Parrish, 188—of Dr. A. Pearson, 62—of Dr. Robt. Percival, 117—of Mr. G. Pollok, 98—of the Hon. Jonathan Sewell, of Quebec, 157—of Mr. Sullivan, 136—of M. Talleyrand, 29—of Mr. Wickham, of Virginia, 74.
- presents a translation of an obituary notice of Prof. Rask, of Copenhagen, 104.
- on a worm in the eye of the horse, 201.
- Bache, Prof., appointed reporter, 74.
- on electricity from a stove, 324.
- compares Prof. Loomis's observations on the magnetic dip with those of Prof. Courtenay and himself, 146.
- on a convenient mode for determining the magnetic dip and intensity, by Prof. Lloyd, 77.
- on the magnetic declination on the February magnetic term day, 1840, 294.
- experiments on the magnetic dip, 294.
- on the simultaneous changes of magnetic intensity at Göttingen and Munich, 200.
- observations of the magnetic intensity at twenty-one stations in Europe, 181, 185.
- resolutions of, regarding magnetic observations, 320.
- reads an extract from a letter from Major Sabine, on contemporaneous magnetic and meteorological observations, &c. 169.
- presents a chart of magnetic observations for Feb. 23, 1840, 200.
- on the measures taken by the British government for obtaining a series of magnetic observations in different quarters of the globe, 117.
- on combined magnetic observations, 242.

- Bache, Prof., exhibits the changes of magnetic variation on the two terms of the German Magnetic Association, of August 30 and November 30, 1839, 151.
- on an instrument for measuring the vertical components of the force of terrestrial magnetism, 311.
 - on a diagram exhibiting changes of magnetic declination at Cambridge and Philadelphia, 311.
 - on Mr. Forshey's remarks on the tornado of Natchez, 243.
 - on the meteors of the 12th, 13th, and 14th of Nov. 1838, 60.
 - on a donation of transparent models of crystals, by Prof. Alexander, 97.
 - on a magnetic observatory to be erected at the Girard College, 118.
 - presents No. 6 of the Society's Proceedings, 90—No. 7, 132—No. 8, 148.
 - relates an instance of the rapid corrosion of a chain cable in sea water, 70.
 - reports the deaths of M. Stainsby and of Dr. Van Marum, 48.
 - on shooting stars, 69.
 - on shooting stars of Nov. 1840, 299.
- Balbo, Count Prospero, of Turin, his death announced, 74.
- Barium, laid before the Society by Dr. Hare, 104.
- extrication of, 130.
- Barometer, standard, constructed by Mr. Green, 320.
- Bessel, M., investigates the parallax of the star 61 Cygni, 78.
- Bills of credit, continental, Mr. Breck on the, 235, 248.
- Blind, thin sheets of lead used by the, in writing, &c., 98.
- Institution, use of the wax tablet and iron stylus in the, 94.
- Blood, fluid 15 hours after death, which subsequently coagulated, 216.
- Blowpipe, compound, of Dr. Hare, remarks on the, by Dr. H., 59.
- Blumenbach, John Frederick, his death announced, 188.
- Blunt, Mr. E., on the solar eclipses of May 14, 1836, and Sept. 18, 1838, 177.
- Bonaparte, Lucien, Prince of Canino, his death announced, 276.
- Bond, Mr. W. C., chart of extraordinary variations of magnetic declination at Cambridge on May 29, 1840, 293.
- Bonnycastle, Mr., on the insufficiency of Taylor's theorem, &c., with remarks on the development and continuity of functions, 214, 227
- on a new principle in regard to fluids in motion to produce rupture of the vessels, &c., 191.
- Bonnycastle, Mr., notes of experiments to determine the depth of the sea by the echo, 39.
- his death announced, 295.
- Bowditch, Dr. N., his death announced, 10.
- bust of, directed to be purchased, 80.
 - family of, to be furnished with the Transactions of the Society, 117.
- Boyé, Mr. M. H. See Rogers, Prof. H. D.
- and Mr. Clark Hare, on perchloric ether, 261, 319.
- Bradford, Mr. Thomas, his death announced, 16.
- Breck, Mr. historical sketch of the continental bills of credit, from 1775 to 1781, 235, 248.
- By-laws in regard to the contribution of members, 95.
- Calcium, brilliant metallic spangles of, 83.
- extrication of, 130.
 - portion of, laid before the society by Dr. Hare, 104.
 - recent experiments to obtain, 100.
- Capillary action, phenomenon of, 82.
- Carbonic acid, solidification of, by Dr. Mitchell, 15.
- Carey, Mr. Matthew, his death announced, 117.
- obituary notice of, directed, 117.
- Cecidomyia Destructor, Miss Morris on the, 282, 318.
- Ceraphron Destructor, Miss Morris on the, 282, 318.
- Chapman, Dr. announces the death of Mr. Matthew Carey, 117.
- announces the probability of obtaining the correspondence of Robert Morris, &c., 209.
 - on a presumed earthquake, Nov. 14, 1840, 301.
 - presents meteorological observations, given by Mrs. Madison, 117.
 - letter to, from the Prince of Musignano, inviting the Society to send a delegate to the meeting of scientific men at Pisa, in Oct 1839, 108.
- Chemistry, communications relative to, by Dr. Hare, 61.
- Chinese system of writing, Rev. Mr. Dickinson on the, 200.
- Messrs. Gutzlaff, and Du Ponceau on the, 120.
- Chlorine, mode of preparing, in Dr. Hare's self-regulating reservoir, 160.
- Climate of the Atlantic States, Dr. Hare on the, 187.
- Coates, Dr. announces the formation of the Pathological Society, 139.
- Coins and Medals, presented by Col. Linah, report on the, 70.

- Colimacea, nineteen new species of, described by Mr. Lea, 173.
- Colonial Records, copy of, presented to Mr. Du Ponceau, 105.
- Colours, loss of power of distinguishing, cases of, 104, 117, 265.
- Comet, Galle's first, results of observations of, 301.
- Galle's second, Mr. Walker, and Mr. Loomis on, 201, 215.
- Galle's second, Prof. Rümker on, 275.
- Galle's third, 215.
- Comets, Galle's, astronomical observations in reference to, 235, 247.
- New formulæ relative to, by Mr. Nulty, 38, 43.
- Committees, standing, appointed for 1840, 169.
- Congelation of water, by the evaporation of ether, &c. 156, 198.
- Cooper, Dr. Thos., his death announced, 104.
- Corrosion, rapid, of a chain cable, in seawater, 70.
- Corymbifera, Mr. Nuttall, on the, 320.
- Cresson, Mr. exhibits specimens of Naphthaline, 299.
- on a presumed earthquake, Nov. 14, 1840, 301.
- Crystals, transparent models of, presented by Prof. Alexander, 97.
- Cyclovolute, magic, on some points regarding the, 289, 293.
- Daguerreotype, specimens of, by Mr. Cornelius, 155, 181.
- by Mr. Seybert, 166.
- Dearborn, Mr. Benjamin, his death announced, 7.
- De Lancey, Bishop, obituary notice on Bishop White, 117.
- Deleuze, J. P. F., his death announced, 325.
- Demmé, Dr., announces the formation of the Societas Bibliophilorum Stuttgartiæ, 312.
- Dickinson, Rev. James T., letter to Mr. Du Ponceau, on the Chinese system of writing, 200.
- Dixon, Mr. Joseph, invention of a transfer process, 206.
- Donations for the cabinet, 4, 6, 35, 43, 50, 57, 63, 68, 96, 120, 150, 166, 185, 190, 213, 225, 247, 261, 278, 284.
- Donations for the Library, 2, 4, 5, 6, 8, 9, 11, 12, 15, 16, 21, 29, 33, 42, 47, 49, 56, 60, 62, 68, 70, 73, 75, 78, 81, 87, 90, 95, 98, 102, 105, 109, 113, 118, 126, 137, 140, 149, 157, 166, 167, 170, 172, 179, 182, 189, 194, 203, 209, 219, 243, 257, 267, 276, 283, 291.
- Dunglison, Dr., announces the death of Mr. T. W. Griffith, 19.
- Dunglison, Dr., case in which blood flowed 15 hours after death, and coagulated, 216.
- reports the minutes of the Historical and Literary Committee, 247.
- appointed reporter for 1840.
- announces the publication of No. 10 of the Society's proceedings, 188, of No. 11, of the proceedings, 209—of No. 12, of the proceedings, 267—of No. 13, of the proceedings, 292.
- on a tornado at New Haven, on the 31st of July, 1839, 111.
- on some new vaccine virus, 68.
- case of worm, in the eye of a horse, 200, 208.
- Du Ponceau, Mr., announces the death of M. Adet, 10.
- announces the death of Mr. Godon, 295.
- on works in reference to the discovery, geography, &c., of America, now publishing in Europe, 251.
- letter to Mr. Vaughan, in answer to Mr. Gutzlaff, on the Chinese system of writing, 120.
- announces the reception of the Cochinchinese Dictionary, of Bishop Taberd, 235.
- offered, by the Society, a copy of the Colonial Records, 105.
- presents a Grammar of the Iroquois Language, by E. Williams, 46.
- exhibits a Japanese and English Vocabulary, and a Translation of a comparative Vocabulary of the Chinese, Korean, and Japanese languages, by the Rev. Mr. Medhurst, 41.
- announces the publication abroad, of a Cochinchinese Dictionary, and of a Grammar of the Berber language, 166.
- presents a MS., by Mr. Heckewelder, containing words in the Lennape language, 271.
- on the Silk Culture in India, 214.
- presents a MS., from M. Nicollet, on the language of the Sioux, 289.
- historical account of the origin and formation of the Society, 233.
- presents a Vocabulary of the language of the Valiente Indians, by Col. Galindo, 38.
- Earthquake, presumed, Nov. 14, 1840, 301.
- Eberle, Dr. John, his death announced, 6.
- Eclipse of the Sun, committee appointed to observe the, 31.
- committee report in part, 35, 44, 48, 50, 58, 64, 107.
- Eclipses, solar, of May 14, 1836, and Sept. 18, 1838, Mr. E. Blunt on the, 177.

- Electricity of the animal body, 324.
 — contributions to, by Prof. Henry, 54, 65, 233, 299.
 — developed under combustion, 324.
 — developed during crystallization, 324.
 — given off from a common grate, 324.
 — of a jet of steam, 311, 320.
 — given off from a lady, 324, 325.
 — from the frame of a mirror, 324.
 — from a cast-iron stove, 323, 324.
 — as an instrument in the production of storms, 187.
 — developed under various circumstances, 323.
 — lateral discharge of, 6.
 — ordinary, currents by induction from, 14.
 Electro-dynamic induction, Prof. Henry on, 54, 65, 233, 299, 315.
 Electro-magnetic machine, invented by Prof. Henry, 301.
 Emerson, Dr., on the electricity of the animal body, 324.
 Encke, Prof., letter to Prof. Bache on observatories, 92.
 Engles, Mr. James P., presents a MS. treatise on the means of extending the learning and civilization of Europe to India, by C. E. Trevelyan, at Kotah, 150.
 Ether, hyponitrous, certain products from the formation of, 176.
 — — formed by Messrs. Boyé and Hare, 261, 319.
 Ethule, perchlorate of, 261, 319.
 Eye, catoptric examination of the, 97, 102.
 Fisher, Mr., announces the death of Mr. Levett Harris, 149—of Benjamin R. Morgan, 301.
 — letter relative to the History of the Society, 234.
 Fly, Hessian, Miss Morris on the, 282.
 Forshey, Prof., observations upon the meteors of August, 1840, 261, 292.
 — account of the great mound near Washington, Adams County, Mississippi, 271, 305.
 — on the tornado of Natchez, 243.
 Fox, Mr. Charles P., deposits papers of Franklin with the Society, 253.
 — presents the Franklin papers to the Society, 276.
 — vote of thanks to, for the Franklin papers, 276.
 Franklin papers, deposited with the Society, 253.
 — — presented to the Society, 276.
 — — committee appointed to arrange, 267.
 Galindo, Col. D. J., vocabulary of the Valiente Indians, 38.
 Galvanic apparatus for producing reciprocating motion, 391.
 — current, two kinds of dynamic induction caused by, 135.
 — ignition used in rock blasting, 99.
 — influence through a coil of wire, extent of the, 99.
 Galvanism, communications relative to, by Dr. Hare, 61.
 — medals copied by, specimens of, 171.
 Geological specimens, from Mr. J. K. Townsend, 4.
 Geology of the tertiary formations of Virginia, 69, 80, 88.
 Gillies, Mr., on the meteors of Nov. 1840, 301.
 Glass, application of radiant heat to, 159.
 Goddard, Dr., on the disengagement of electricity during the crystallization of nitre, 324.
 — on electricity from a stove, and from the frame of a mirror, 324.
 Godon, Mr. S., his death announced, 295.
 Goetz, Pierre de, letter from, accompanying works from the Imperial Russian Academy, &c. 16.
 Griffith, Mr. T. W., his death announced, 19.
 Gutzlaff, Rev. Charles, letter to Mr. Vaughan, on the Chinese system of writing, 120.
 Hare, Dr., appointed to prepare an obituary notice of Mr. Sullivan, 136.
 — on phenomena connected with the presence of aqueous vapour in the atmosphere, &c., 237.
 — description of an apparatus for deflagrating carburets, phosphurets, or cyanides, in vacuo, &c. &c., 138.
 — on his compound blowpipe, 59.
 — on the extrication of barium, strontium, and calcium, 130.
 — exhibits specimens of barium, strontium, and calcium, obtained by him, 104.
 — results of experiments to obtain calcium, 100.
 — communications on subjects relating to chemistry and galvanism, 61.
 — on a mode of preparing pure chlorhydric acid and chlorine, 160.
 — suggests the galvanic fluid to produce an explosion below the surface of water, 41.
 — on the results of exploding the elements of water, in contact with certain gases or essential oils, 16.
 — on the blasting of rocks by the aid of galvanic ignition, 99.

- Hare, Dr., on the climate of the Atlantic states; on the trade winds; and on electricity as a principal instrument in the production of storms, 187.
- on the congelation of water by the evaporation of ether, &c. 156.
- engraving and description of an apparatus and process for the rapid congelation of water, &c., 198, 213.
- on the electricity of the animal body, 324.
- on the electricity of a jet of steam, &c., 324.
- on the extent to which the galvanic influence can extend through a coil of wire, 199.
- on a liquid and gaseous ethereal compound, resulting from the reaction of nascent hyponitrous acid on alcohol, 251, 270.
- on Prof. Loomis's views of storms, 193.
- obtains brilliant metallic spangles of calcium, 83.
- on the change effected in the nitrates of potash and soda, by the limited application of heat, with a view to obtain pure oxygen, 251, 270.
- on the method of obtaining oxygen from nitre, 139.
- exhibits a specimen of pure platinum, freed from iridium, 14.
- exhibits a mass of fused platinum between 22 and 23 ounces in weight, 42.
- describes a specimen of potassium, in the globular form, assumed by falling into naphtha, 166.
- on certain products from the formation of hyponitrous ether, &c., 176.
- on the application of radiant heat to glass, 159.
- results of experiments on the rarefaction of moist and dry air, 200.
- on a new mode of procuring silicon, 175.
- on the tornado at Philadelphia, July 13, 1840, 256.
- on a tornado at Providence, R. I. 48, 58.
- remarks on a tornado at Somerset, Mass., 42.
- on tornadoes and the electrical theory of their formation, 122.
- presents copies of a French translation of his communication on the subject of tornadoes, 236.
- on an extensive voltaic apparatus, constructed under his direction for the Lowell Institution, 253.
- Mr. Clark, on the perchlorate of ethule, 261, 319.
- Harris, Mr. Levett, his death announced, 149.
- Hays, Dr., appointed to prepare an obituary notice of Mr. Keating, 234.
- remarks on two animals in the museum of Mr. Koch, of St. Louis, 283.
- on the catoptric examination of the eye, 97, 102.
- on entozoa in the eye, and elsewhere, 209.
- relates a case of cerebral disease, with loss of the power of distinguishing colours, 104.
- on the inability to distinguish certain colours, 265.
- on a case of perverted vision, in which all perpendicular lines appeared double, whilst horizontal ones were seen accurately, 156.
- presents a table of the peculiarities of those not able to distinguish colours, 117.
- on the operation recently devised for strabismus, and its effects on vision, 273.
- on a new vaccine virus, 90.
- Heckewelder, Mr., MS. of words in the Lennape language, 271.
- Henry, Prof., announces, from ordinary electricity, currents by induction, &c., 14.
- announces the discovery of two distinct kinds of dynamic induction by a galvanic current, 135.
- on the development of electricity during combustion, &c., 324.
- on the electricity of a jet of steam, 322.
- papers on electro-dynamic induction, 54, 64, 233, 299, 315.
- on electro-dynamic induction, magnetic distribution, &c. 233.
- on an electro-magnetic machine invented by him, 301.
- on a galvanic apparatus for producing reciprocating motion, 301.
- on the lateral discharge of electricity, &c. 6.
- on a phenomenon of capillary action, 82.
- Hessian fly, Miss Morris, on the, 282, 318.
- Hewson, Dr. T., meteorological journal of, report of committee on the, 104.
- Historical committee announce the publication of Mr. Du Ponceau's Dissertation on the Chinese system of writing, 7.
- report of the, 247.
- Hopkinson, Judge, deposits the log-book of the first steam vessel across the Atlantic, 193.
- on a presumed earthquake, Nov. 14, 1840, 301.
- Horner, Dr., on a fancied earthquake, Nov. 14, 1840, 301.

- Horner, Dr., reads a necrological notice of Dr. Physick, 13.
 — on the dental system of the Mastodon, 293, 307.
 — on the remains of the Mastodon, and other extinct animals at St. Louis, Mo., 271, 279.
 Hulliken, Mr. S. P., letter from, on an inscription on a stone near Wheeling, 46.
 — and Dr. Townsend, report on the letters of, 104.
 Humphreys, Mr. Joshua, on the naval construction of the United States, 4.
 — death of, announced, 3.
- India, silk culture in, 214.
 Indian Vocabularies, from Mr. J. K. Townsend, 4.
 Indians of the N. W. Coast of America, vocabularies of the, 146.
 — Valiente, vocabulary of the language of the, 38.
 Ingersoll, Mr. C. J., reads an obituary notice of Mr. Madison, 61.
 Inscription on a stone found near Wheeling, 46.
 Institution, National, of Washington, letter from the, 299.
 Iroquois language, grammar of the, 46, 251.
- Jefferson, Mr., his writing chair deposited, 11.
 Justice, Mr., announces the arrival of the astronomical instruments at the High School observatory, 276.
 — observations with the new telescope, 312.
 — presents an original document of Wm. Penn, 181.
 — on a tornado on the 31st of July, 1839, near Philadelphia, 111, 118.
 — added to the observatory committee, 325.
- Kane, Mr., announces the appointment of Dr. Bache as reporter to the Society, 24.
 — deposits the writing chair of Mr. Jefferson during the Congressional Session of 1776, 11.
 — on the inability to distinguish colours, 117.
 Keating, Mr. Wm. H., death of, announced, 234.
 Kendall, Mr. E. O., Paper on the longitude of several places in the United States, deduced from the solar eclipse of Sept. 18, 1838, 141.
- Lea, Mr., appointed to write an obituary notice of Mr. Carey, 117.
 — on certain facts by Mr. Rang, in relation to the torpidity of the *Anadonta Chaiziana*, 8.
 — description of nineteen new species of colimacea, 173.
 — on electricity from a common grate, 324.
 — memoir on fresh water and land shells, 23, 282, 285.
 — describes a new shell, *Melania Cincinnatiensis*, 66.
 — notice of the Oolitic formation in America, &c., 214, 225.
 — on the *Patella Amœna*, 181, 187.
 — exhibits specimens of photographic representations of plants and shells, 171, 177.
 — remarks on the tornado at Philadelphia, July 13, 1840, 255.
 — supplementary note to his paper on the Uniones, 11.
 Le Comte, M., death of, announced, 60.
 Lennape language, words in the, 271.
 Linah, Col., report on the coins and medals presented by, 70.
 Lloyd, Prof., of Dublin, convenient mode of determining magnetic dip and intensity, 77.
 Locke, Dr. John, on magnetic observations, 19, 24.
 — magnetic observations in the N. W. of the United States, 181.
 — on certain magnetic observations at Cincinnati and Louisville, 214, 271.
 Longitude, determination of, from corresponding observations of meteors, 161.
 — of various places in the United States, deduced from the solar eclipse, 141.
 — of several stations near the southern boundary of Michigan, by Capt. Talcott, 7.
 Loomis, Prof., on Galle's second comet, 201, 215.
 — report on his observations to determine the magnetic dip, at various places in Ohio and Michigan, 116.
 — astronomical observations made at Hudson observatory by, 129.
 — additional observations of the magnetic dip in the United States, 144.
 — observations to determine the magnetic intensity in the United States, &c., 293, 299.
 — on the storm in the United States about the 20th of Dec. 1836, 187, 195.
 Lorich, Chev., obituary notice of, 61.
 Lunar occultations, observations of, 71, 227.
- Maclure, Mr. Wm., death of, announced, 209.
 Madison, Mr., obituary notice of, by Mr. C. J. Ingersoll, 61.

- Madison, Mrs.**, presents certain meteorological observations by the late President Madison, 117.
 — vote of thanks to, for the same, 117.
- Magnetic declination**, extraordinary variations of, at Cambridge, 293.
 — declination at Toronto, on the Feb. magnetic term day, 293.
 — diagram, exhibiting changes of, at Cambridge and the Girard College, 311.
 — dip and intensity, convenient mode of determining, 77.
 — dip, report on Prof. Loomis's paper on the, 116.
 — dip in the United States, additional observations on the, by Prof. Loomis, 144.
 — dip, experiments by Prof. Bache on the, 294.
 — dip, observations on the, 293, 299.
 — dip, observations of Prof. Loomis on the, compared with those of Professors Bache and Courtenay, 146.
 — distribution, Prof. Henry on, 233.
 — intensity at twenty-one stations in Europe, Prof. Bache on the, 181, 185.
 — intensity at Göttingen and Munich, simultaneous changes of, 200.
 — intensity at several places in the United States, 293, 299.
 — observations, Dr. Locke's paper on, 19, 42.
 — observations, letter from Major Sabine respecting, 313.
 — observations, letter from the foreign Secretary of the Royal Society on, 111.
 — observations in different quarters of the globe, measures of the British government for obtaining, 117.
 — observations, combined, recommended by the Royal Society, 242.
 — observations, combined, resolutions respecting, 148.
 — observations at several places in the north-west of the United States, by Prof. Locke, 181.
 — observations, Feb. 20, 1840, chart of the, by Prof. Bache, 200.
 — observations at Cincinnati and Louisville, &c. &c. 214.
 — observations, memorial to Secretary of War on resolutions respecting, 320.
 — observations, report to House of Representatives respecting, 320.
 — variation on the terms of the German Magnetic Association, Aug. 30 and Nov. 30, 1839, 151.
 — and meteorological observations, memorial to the Secretary of War regarding, 151.
 — and meteorological observations, Major Sabine on, 169.
- Magnetism**, Dr. Sherwood's claims to discoveries in, reviewed by Dr. Patterson, 25, 27.
 — terrestrial, vertical components of the force of, instrument for measuring, 311.
- Markoe, Mr. F., Jun.**, Secretary of the National Institution of Washington, letter from, 299.
- Mason, Mr. E. P.** See Smith, Mr. H. L.
- Mastodon** and other bones at St. Louis, Mo., 271, 279.
 — bones, committee to describe, 166—report, 279.
 — dental system of the, 293.
- Maximilian, Prince**, of Neuwied, resolution respecting, 217.
- Medals**, copied by galvanism, specimens exhibited, 171, 181.
- Medals.** See Coins.
- Medhurst, Mr.**, his vocabularies referred to, 41.
- Members elected**, 3, 11, 73, 95, 108, 136, 169, 201, 256, 290.
 — surviving, of the Society, number of, 169.
- Mendenhall, Mr. B. F.**, deposits an illuminated MS. in the Pali language, 80.
- Meteorological observations**, report of committee on, 104.
 — report to House of Representatives respecting, 320.
- Meteors**, corresponding observations of, mode of determining longitudes from, 161.
 — or shooting stars, Prof. Bache on the, 69.
 — of November, 1838, Prof. Bache on the, 60.
 — of November, observed in the exploring expedition, 77.
 — of August, 1840, Mr. Walker on the, 261.
 — of August and November, 1840, Mr. Walker on the, 310.
 — of August, 1840, Prof. Forshey on the, 261, 292.
 — of November, 1840, Prof. Bache on the, 299.
 — of November, 1840, Mr. Gillies on the, 301.
- Mirage**, lateral and vertical, two appearances of, by Prof. S. Alexander, 188.
- Mitchell, Dr.**, describes Jeffrey's respirator, 47.
 — solidifies carbonic acid, 15.
- Morgan, Benjamin R.**, death of, announced, 301.
- Morris, Miss Margaretta H.**, on the Hessian fly, and the Ceraphron destructor, its parasite, 282.
 — Robert, correspondence of, 209.

- Mound, Indian, near Washington, Adams County, Miss., 271, 305.
- Multiplier, rotary, by Dr. Hare, 65.
- Museum, Geographical, about to be formed by the Geographical Society of Paris, 138.
- National, in connexion with the Smithsonian legacy, proposed, 111.
- Musignano, Prince of, letter to Dr. Chapman in relation to the scientific meeting at Pisa in October, 1839, 108.
- Naphthaline, obtained from coal tar, 299.
- Naval construction of the United States, early history of the, 4.
- Nebulæ, observations on, with a fourteen feet reflector, 199.
- Newman, Dr. John, of North Carolina, death of, announced, 108.
- Nichols, Mr. F., death of, announced, 108.
- Nicklin, Mr., on a presumed earthquake, Nov. 14, 1840, 301.
- reads the dedication to the Society by Dr. Daubeny, of a Memoir on the Geology of North America, 251.
- Nicollet, M., on the language of the Sioux, 289.
- Nulty, Mr., New Formulæ, relative to Comets, 38.
- report on his paper on New Formulæ, 43.
- on some points connected with his Magic Cyclovolute, 289, 293.
- Nuttal, Mr., Description of New Species and Genera of Plants, collected on a Tour to the Pacific, in Oregon, the Sandwich Islands, and Upper California, 282, 284.
- Obituary notices directed,—of Dr. Bowditch, 10.
- of Mr. Carey, 117.
- of Mr. W. H. Keating, 235.
- of Mr. Sullivan, 136.
- Observatories to be established in the United States, recommended by the Royal Society, 242.
- Prof. Encke's letter on, 92.
- magnetic, Memorial to the Secretary of War respecting, 151.
- Observatory at Harvard, 294.
- at the Central High School, petition to the Legislature in relation to a director of the, 80.
- designs for a, 290.
- in Rittenhouse Square, resolutions of Society regarding, 295.
- resolutions of Councils regarding, 310.
- committee, report of, on the Observatory fund, &c., 295.
- committee, report an ordinance of Councils, in relation to an observatory, 299.
- Observatory committee, instructed to carry into effect the object of the ordinance of Councils, 310.
- committee, Messrs. Bache and Walker added to the, 70.—Mr. Justice added, 325.
- Occultations, Lunar, of the fixed stars, at different places, 227.
- observed in April, May, June, and August, 1840, by Prof. Rümker, 301.
- Officers, election of, 1, 67, 165.
- Oolitic formation in America, by Mr. Lea, 214, 225.
- Ord, Mr., animadverts on a statement by Mr. Audubon, in relation to Wilson, the ornithologist, 272.
- thanks of the Society given to, for purchasing books whilst abroad, 105.
- Oxygen from nitre, mode of obtaining, 139.
- Pali language, illuminated MS. in the, 80.
- Parallax of the star 61 Cygni, recently investigated, by M. Bessel, Mr. Walker on the, 78.
- Parrish, Dr. Joseph, death of, announced, 188.
- Patella Amæna, Mr. Lea on the, 181, 187.
- Patterson, Dr., announces the death of Mr. Bonnycastle, 295.
- announces the death of Dr. Bowditch, 10.
- announces the death of Mr. Francis Nichols, 108.
- on an amendment of the by-laws, 95.
- presents specimens of the Daguerreotype, by Mr. Robert Cornelius, 155, 181.
- experiments on the electricity of a jet of steam, 320.
- submits the log-book of the steamship Savannah, the first that crossed the Atlantic, 14.
- review of Dr. Sherwood's claims to discoveries in magnetism, 25.
- exhibits designs for an observatory &c., 290.
- on the use of the Roman wax tablet and iron stylus at the Institution for the blind, 94.
- on a mode of using thin sheets of lead by the blind in writing &c., invented by Mr. Saxton, 98.
- Peale, Mr., electricity of a jet of steam, 311, 321.
- exhibits medals obtained by galvanic action, with remarks thereon, 187.
- Peale, Mr. T. R., on meteors observed on the 12th-13th Nov. in the exploring expedition, 77.
- Pearson, D. A., death of, announced, 62.

- Peltier, Mr., his description of a tornado animadverted on by Dr. Hare, 122.
- Penn, Wm., original document of, 181.
- fac simile of original grants and deeds to, 261.
- Percival, Dr. Robert, death of, announced, 117.
- Photographic representations of plants and shells, 171, 177.
- Physick, Dr., necrological notice of, 13.
- Pisa, scientific meeting at, Oct. 1839, 108.
- Plants, new genera and species of, by Mr. Nuttall, 282, 284.
- Platinum, chloride of, nitric oxide and hydrochloric acid, new compound of, 145.
- fused, mass of, exhibited by Dr. Hare, 14.
- fused, large mass of, 42.
- new compound of, discovered, 94.
- pure, freed from iridium, exhibited by Dr. Hare, 14.
- Prisons, Reports of, printed by order of the House of Commons, directed to be purchased, 167.
- Pollok, Mr., death of, announced, 98.
- Potash and soda, change effected in, by the limited application of heat, &c., 251, 270.
- Potassium, improved process for obtaining, by Dr. Hare, 65.
- in the globular form, specimen of, 166.
- Pressures, accumulative and instantaneous, the distinction between, 191.
- Prinsep, Mr., of Calcutta, death of, announced, 267.
- Proceedings of the Society, publication of an abstract of the, recommended, 18.
- resolutions in regard to the distribution of the, 69.
- rules regarding the distribution of the, 207.
- Publication committee report the publication of part 2, vol. 4, of the Transactions, 192.
- — report the completion of the 6th vol. of the Transactions, 151.
- — announce a new part of the Transactions, 267.
- — report the publication of the first part of the 7th vol. of the Transactions, 273.
- Raguet, Mr., announces the death of Don Jose Bonifacio de Andrada e Silva, 61.
- reads an obituary notice of Chevalier Lorick, 61.
- Rain-gauge, Osler's, Mr. Walker on, 3.
- Rask, Prof., of Copenhagen, obituary notice of, 104.
- Respirator, Jeffreys, described by Dr. Mitchell, 4.
- Riddle, Lieut., on the magnetic declination, &c., at Toronto, on the February magnetic term day, 293.
- Rock-blasting, by the aid of galvanic ignition, 199.
- Rogers, Professors W. B. and Henry D., contributions to the geology of the tertiary formations of Virginia, 69, 80, 88.
- Prof. H. D., on the development of electricity under combustion, 324.
- on perchloric ether, 311.
- and Mr. Boyé, discover a new compound of platinum, 94, 145.
- Rumker, Mr., astronomical observations in reference to Galle's comets, 235, 247, 275.
- results of observations of Galle's first comet, and occultations observed in April, May, June, and August, 1840, 301.
- Sabine, Major, on contemporaneous magnetic and meteorological observations, 169, 242.
- progress of magnetic observations, 313.
- Saxton, Mr., electricity of a jet of steam, 321.
- exhibits copies of medals by galvanism, 171, 181.
- invents a mode of using thin sheets of lead by the blind in writing, &c. 98.
- Sea, depth of the, determination of the, by the echo, 39.
- Seybert, Mr. H., presents a specimen of the Daguerreotype, 166.
- Shell, new, *Melania Cincinnatiensis*, described by Mr. Lea, 66.
- Shells, fresh water and land, Mr. Lea on, 2, 3, 282, 285.
- Shooting stars. See meteors.
- Silicon, new mode of procuring, 175.
- Silk culture in India, 214.
- Sioux, language of the, 289.
- Smith, Mr. H. L., and Mr. E. P. Mason, observations on nebulae, with a fourteen feet reflector, 199—reported on, 206.
- Smithsonian legacy, proposed National Museum connected with the, 111.
- Societies, list of, to receive the proceedings, 218, 234.
- Society, American Philosophical, history of the, 233, 234.
- Geographical of Paris, announces the intention of forming a Museum, and solicits contributions, 138.
- Pathological, formation of, announced, 139.
- Royal, letter from the secretary of the, in relation to magnetic observations, 111.
- Royal, circular relating to the Term observations, 169.

- Society, Royal**, recommend combined magnetic observations and the establishment of observatories in the United States, 242.
- Stainsby, Mr.**, death of, announced, 48.
- State records**, early proposed publication of the, 5.
- Steam-ship Savannah**, the first that crossed the Atlantic, 14.—log-book of the, 193.
- Storm of the 20th of Dec.**, 1836, Prof. Loomis on the, 187, 195.
- Storms**, electricity the principal instrument in the production of, 187.
- Prof. Loomis's views of, commented on by Dr. Hare, 193.
- Strabismus**, operation recently devised for, 273.
- Strickland, Mr.**, presents a specimen of asphaltic rock from Seyssel, and mosaic work made therefrom, &c., 47.
- Strontium**, extrication of, 130.
- portion of, laid before the Society, by Dr. Hare, 104.
- Stuttgart, Society for the publication of historical and antiquarian works**, 312.
- Sullivan, Mr.**, death of, announced, 136.
- Talcott, Capt.**, paper on the longitude of several stations near the southern boundary of Michigan, 7.
- Talleyrand, M.**, death of, announced, 29.
- Telescope**, new, at the High School, results of observations with, 312.
- Tornado at Natchez**, Prof. Forshey on the, 243.
- at New Haven, on the 31st of July, 1839, Dr. Dunglison on a, 111.
- near Philadelphia, Mr. Justice on a, 111, 118.
- of limited extent at Philadelphia, July 13, 1840, 255.
- at Providence, paper on, by Dr. Hare, and Mr. Allen, 48, 58.
- at Somerset, Mass. Dr. Hare on a, 42.
- description of a, by M. Peltier, animadverted on by Dr. Hare, 122.
- Tornadoes**, and the electrical theory of their formation, 122.
- Townsend, Mr. J. K.**, announces by letter the transmission of certain donations, 4.
- vocabularies in MS. of the languages of the Indians of the Northwest coast of America, 46.
- Dr., report on the letter from, 104.
- Trade winds**, Dr. Hare on the, 187.
- Tyson, Mr.**, letter on the early records of the State, 5.
- Uniones, Mr. Lea's paper on the**, supplementary note to, 11.
- Vaccine virus**, new, 68, 90.
- Van Marum, Dr. M.**, death of, announced, 46.
- Vaughan, Mr.**, announces the death of Benjamin Allen, LL.D. 217—of Count Balbo, of Turin, 74—of Lucien Bonaparte, Prince of Canino, 276—of Dr. Thomas Cooper, 104—of Mr. Dearborn, 7—of J. P. F. Deleuze, 325—of Mr. Humphreys, 3—of Mr. Keating, 234—of Mr. William Maclure, 209—of Mr. Prinsep, of Calcutta, 267.
- announces the receipt of the Cochinchinese Dictionary ordered by the Society, 273.
- presents a transfer of a printed page according to a process invented by Mr. Joseph Dixon, of Taunton, 206.
- Vision**, effect on, by the operation for strabismus, 273.
- Walker, Mr.**, on Mr. Osler's anemometer and rain-gauge, 3.
- on Galle's second comet, 201, 215.
- refers to the discovery, by Galle, of a third comet, 215.
- on determining longitudes from corresponding observations of meteors, 161.
- on the August meteors, 261.
- on the meteors of August and November, 1840, 310.
- on the observations at Harvard, 294.
- on the parallax of the star 61 Cygni, recently investigated by Mr. Bessel, 78.
- remarks on Dr. Sherwood's alleged discoveries in magnetism, 27.
- on a tornado of limited extent, at Philadelphia, on July 13, 1840, 255.
- Warren, Dr.**, of Boston, resolution in regard to his letter on the subject of the formation of an American association for the promotion of science, 77.
- Water**, decomposition of, by galvanism, apparatus for the, 65.
- rapid congelation of, engraving of an apparatus and process for, 198, 213.
- White, Bishop**, obituary notice of, by Bishop De Lancey, 117.
- Wickham, Mr.**, of Virginia, death of, announced, 74.
- Williams, Mr. Eleazer**, grammar of the Iroquois language, 46, 251.
- Worm in the eye of a horse**, 200, 208, 209.
